

Appl. No. 10/573,861
Amendment dated March 8, 2010
Reply to Office Action of December 7, 2009

AMENDMENTS TO THE SPECIFICATION:

Applicants are submitting herewith a replacement specification (a clean copy) and a marked-up copy showing the changes. Applicants discovered a typographical error in the specification (namely, inclusion of the term “fuel” in “fuel cell”) and have therefore removed the term “fuel” from the specification as well as from the claims. No new matter has been added by these amendments. In addition, please note that the Japanese priority document JP 2004-318091 is not directed to a “fuel cell” but rather to just a “cell.” Therefore, the amendments to the specification and claims are in accordance with the priority document.
